SUBJECT: 2-ALKYLNICOTINOIDS/PM 764/AMENDMENT

Attached is a copy of the amendment as filed on April 10 by Mr. Depaoli. Your comments were incorporated as requested, and they appear on page 10 and page 11.

George indicated that an affidavit may be required by the Examiner to support your assertions regarding the treatment of nornicotine or anabasine with alkyl lithium; treatment of 6-methylnicotine with an alkyl lithium; and treatment of 3- or 4-substituted pyridines according to the process of the invention.
